<https://www.youtube.com/watch?v=Q9n2mLqXFpU>

```
"scripts": {  
  "start": "react-scripts start",  
  "predeploy": "npm run build",  
  "deploy": "gh-pages -d build",  
}
```

Npm run deploy

"homepage": "http://beaintech.github.io/birthday-invitation",

<http://beaintech.github.io/birthday-invitation>

<https://beaintech.github.io/3d-bear-arts/>

`npm create vite@latest`

1. `npm init -y`
2. `npm install three`
3. `npm i --save-dev @types/three`
4. `npm install vue-router`
5. `npm install vue-router@next`
- 1.
2. `npm install -g http-server`
3. `http-server`

Chrome: Press Ctrl + Shift + R (Windows/Linux) or Cmd + Shift + R (Mac) to force reload without cache.
